

## MOBILE DEVICE MANAGEMENT

Dyrand MDM is an easy-to-use cloud platform with all of the essential functionality for end-to-end management of today's mobile devices including iPhones, iPads, Androids, Kindle Fire devices, Windows Phones and BlackBerry smartphones.

Dyrand Mobile Device Management (MDM) is the fastest and most comprehensive way to configure devices for enterprise access and secure corporate data on smartphones and tablets — all from a single screen.

As a fully integrated cloud platform, Dyrand simplifies MDM with rapid deployment, visibility and control that spans across mobile devices, applications and documents.

Deployment is quick. In just a few clicks, Dyrand can start enrolling devices and immediately manage the entire mobile device lifecycle — from enrollment to enterprise integration, configuration and management, monitoring and security, support, and analytics and reporting.

### INSTANT MOBILE DEVICE MANAGEMENT

- Increase security & compliance enforcement
- Reduce the cost of supporting mobile assets
- Enhance application & performance management
- Ensure better business continuity
- Increase productivity & employee satisfaction
- Proven approach to cloud-based mobility management
- Powerful management & security to address the full mobility lifecycle
- Seamlessly integrates with all of your existing infrastructure
- Simple & fast with an exceptional customer experience

## Rapidly Enroll Mobile Devices

Dyrand MDM mobile device management streamlines the platform set up and device enrollment process to make life simple for IT and employees.

- Select MDM services and configure device enrollment settings
- Send enrollment requests over-the-air (OTA) using SMS, email, or a custom URL
- Authenticate against Active Directory/LDAP, using a one time passcode, or with SAML
- Create and distribute customized acceptable-use policies and EULAs
- Register corporate and employee owned (BYOD) devices
- Initiate individual or bulk device enrollments
- Apply or modify default device policy settings

## Integrate Mobile Devices with Your Organization

Through the Cloud Extender, integration with your organization is easy and straightforward, without the need for on-premises servers or network reconfigurations.

- Mobile asset information available directly into your PSA
- Instant discovery of devices accessing company systems
- Integrate with Microsoft Exchange, Lotus Notes, and Microsoft Office 365
- Leverage existing Active Directory/LDAP and Certificate Authorities
- Manage BlackBerry Enterprise Server (BES) policies
- Connect with other operational systems through robust web APIs

## Centrally Manage Mobile Devices

Dyrand MDM provides a unified mobile device management console for smartphones and tablets with centralized policy and control across multiple platforms.

- Configure email, calendar, contacts, Wi-Fi and VPN profiles over-the-air (OTA)
- Approve or quarantine new mobile devices on the network
- Create custom groups for granular management
- Distribute and manage public and corporate applications
- Securely share and update documents and content
- Define role-based administrative portal access rights within Dyrand MDM
- Decommission devices by removing corporate data and MDM control

## Proactively Secure Mobile Devices

Dyrand MDM provides dynamic, end-to-end security and compliance management capabilities to continuously monitor devices and take action.

- Require passcode policies with configurable quality, length, and duration
- Enforce encryption and password visibility settings
- Set device restrictions on features, applications, iCloud, and content ratings
- Detect and restrict jailbroken and rooted devices
- Remotely locate, lock and wipe lost or stolen devices  
Selectively wipe corporate data leaving personal data intact
- Implement real-time compliance rules with automated actions
- Enable geo-fencing rules to enforce location-based compliance

## Streamline Mobile Device Management Support

Dyrand MDM delivers the ability to diagnose and resolve device, user or application issues in real-time from a web-based portal; offering complete IT visibility and control, and ensuring optimum mobile user productivity.

- Access device views to diagnose and resolve issues
- Locate lost or stolen devices
- Reset forgotten passcodes
- Send messages to devices
- Update configuration settings in real time
- Help users help themselves with a self-service portal

## Monitor and Report on Mobile Devices

Mobility Intelligence™ (MI) dashboards deliver an interactive, graphical summary of your mobile device management operations and compliance allowing IT to report in real-time across the entire enterprise.

- Monthly executive reports include important mobile device information
- Detailed hardware and software inventory reports
- Configuration and vulnerability details
- Integrated smart search capabilities across any attribute
- Customizable watch lists to track and receive alerts
- BYOD privacy settings block collection of personally identifiable information
- Mobile expense management for real-time data usage monitoring and alerting
